ProTalk[®]

Two-Way Radio & Accessory Catalog
Compact Portable VHF/UHF Business Two-Way Radios

Who Uses Kenwood ProTalk® Radios?

Professionals in many different markets rely on Kenwood's ProTalk® Business Two-Way Radios.

Small Business, Retail Stores, Restaurants, Hotel/Motel, Schools, etc.

ProTalk® UHF PKT-23 LT Radio: 1.5 Watt 4 Channels

ProTalk® UHF TK-3230 XLS Radio: 1.5 Watt 6 Channels

The Kenwood ProTalk® PKT-23 LT and TK-3230 XLS are lightweight, compact, on-site radios that have innovative features ideal for use in retail, restaurant, hotel/motel, educational, multi-family dwelling, and service industry applications. The pocket sized PKT-23 LT provides 1.5 watts of power, 4 channels, and up to 15 hours of operation. The ProTalk® TK-3230 XLS has 1.5 watts of power with 64 pre-programmed UHF business frequencies to choose from. All the features are menu driven and the lighted display gives the user status icons for easy operation. There are 39 quiet talk (QT) privacy codes and 83 additional digital quiet talk (DQT) privacy codes to separate user talk groups on shared frequencies.

Heavy Construction, Steel & Concrete, Property Management, and Inside Buildings

ProTalk® UHF TK-3400U4P / TK-3400U16P Radios: 2 Watt 4 & 16 Channels

The Kenwood ProTalk® 2 Watt UHF series are the most durable UHF members of the ProTalk family of on-site radios. These powerful, portable business radios are the cost-effective solution for your on-site communication requirements. Rugged and dependable, ProTalk® radios increase productivity in applications of heavy construction, steel & concrete, and inside buildings, by managing time, personnel and materials efficiently. They can also enhance the security of your staff and facility. All ProTalk® UHF models feature 2 watts of power for up to a 6 mile range and are available in 4 and 16 channel UHF models with pre-programmed business frequencies. ProTalk® channels and the 39 QT privacy codes and 168 DQT digital privacy codes are programmable by the user to separate user talk groups on shared frequencies.

Outdoor Applications

ProTalk® VHF TK-2400V4P / TK-2400V16P Radios: 2 Watt 4 & 16 Channels

The Kenwood ProTalk® 2 Watt VHF series of portable business radios are the cost-effective solution for your on-site communication requirements. Rugged and dependable, VHF ProTalk® radios are best for outdoor applications. They can also enhance the security of your staff and facility. Available in 4 or 16 channel VHF models with pre-programmed business frequencies. All ProTalk® models feature 2 watts of power for up to a 6 mile range. ProTalk® channels and the 39 QT privacy codes and 168 DQT digital privacy codes are programmable by the user to separate user talk groups on shared frequencies.

Frequently Asked Questions.

How do I know which Kenwood radio to use?

- Determine how the radio will be used: UHF is better indoors through concrete walls or floors, etc. VHF is better outdoors through foliage or line of sight. Also, higher power means a radio will have a wider coverage area.

Are Kenwood radios compatible with other business radios?

- Yes! All you have to do is match the frequency and code.

Can a VHF radio talk to a UHF radio?

- No! VHF and UHF frequency bands are not compatible.

Is an FCC license required?

- YES! You can download FCC form 601 and instructions at www.fcc.gov/formpage.html or call 1-888-call-fcc.

How far can I talk?

- Talk range will vary based upon terrain, conditions and type of radio. The best talk range conditions is flat ground without obstructions, your radio will talk for many miles.

Why are Kenwood radios so durable and rugged?

- Simply because Kenwood knows that radios have to be tough to withstand years of hard indoor and outdoor usage. ProTalk® radios are specially designed to meet or exceed rigid Mil-Spec standards established by the US Department of Defense.

How long will the Kenwood battery last and how long does it take to recharge?
